(54) STICK-TYPE COSMETIC CONTAINER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a stick-type cosmetic container which enables easy filling and replacement and eliminates the fear of an inner holder's dropping off in normal use.

SOLUTION: Consisting of an external cylinder, a sleeve, and an inner holder filled with a stick-type cosmetic material, this stick-type cosmetic container pushes out or pulls in the stick-type cosmetic material filling the inner holder by following the up-and-down movements of a small projection formed on the inner holder. The small projection is guided along an inner holder guide slot that is provided on the sleeve and moved by threads in a screw cut on the inner surface of the external cylinder. It is characterized by the inner holder guide slot with its bottom opened as well as the concave part to store the small projection, provided at the lower part of the inner holder guide slot.
